9. DETAILS:

This report will serve as a request to forward material relative to the Roslindale Bombing Investigation to ATF ETB Explosives Enforcement Officer Clifford Lund. This information was requested by Lund for dissemination to approximately 3000 subscribing members of the International Association of Bomb Technicians and Investigators through that organizations publication. The information is released in hopes that a subscriber may recognize the mechanics of the destructive device used in this incident.

On October 28, 1991 in Roslindale, Massachusetts, a destructive device being examined by Boston Police Department Bomb Technicians Jeremiah Hurley and Francis Foley detonated causing the death of Hurley and critically injuring Foley.

Due the circumstances surrounding this incident the ATF NRT, Northeast was requested and activated on October 29, 1991. As a result of the NRT's efforts, enough evidence was recovered for the ATF Forensic Laboratory to recreate a simulated device.

The device consisted of the following components;

- A) 3-4 sticks of dynamite
- B) 2 Austin Rockstar #6 Detonators, (Blasting Caps)
- C) 5 nine volt batteries
- D) 3 AA batteries
- E) 1 Radio Shack Archer SPST Toggle Switch, Cat.# 275-602
- F) 1 Futaba Switch
- G) 1 Futaba Radio Control
- H) 1 Futaba Servo (FSH-6E)

REPORT OF INVESTIGATION - CONTINUATION SHEET
(Law Enforcement)

TITLE OF INVESTIGATION
Roslindale Bombing

INVESTIGATION NO.
63212-92-2008-C

DETAILS (Continued)

- I) 1 Futaba Receiver
- J) 1 Futaba battery holder
- K) 3 types of tape, 3/4" black electrical tape, fiber reinforced silver duct tape and white two sided plastic tape.

The aforementioned components were encased in a 12 3/4"x 5 1/4"x 1 1/2" box made from wood paneling. Attached to the box were approximately 10-15 General Hardware 372C button hole magnets each measuring 1" in diameter and 5/8" in thickness. Also, 2 large doughnut shaped magnets, approximately 3 1/2" in diameter and 5/8" in thickness. The center ring width was approximately 3/4" in width. The magnets were all attached to the box by using a yellowish colored adhesive. The box was then spray painted black. It is believed that the receiver for this device was affixed to the bottom of the wood box at a corner. The receiver measured approximately 2 1/2"x 4"x 1 1/4".

To assist in this investigation, ATF in conjunction with the Boston Police Department Patrolmen's Association have offered a combined reward of \$50,000.00 (\$25,000.00 per organization), for information leading to the arrest and conviction of any individual/individuals involved in this incident.

Any donations in the name of Jeremiah Hurley may be sent to the Jeremiah Hurley Fund, Hyde Park Savings Bank, 1196 River Street, Hyde Park, Massachusetts, 02136.

There has not been a fund set up at this time for Officer Foley.
