On Tuesday 11/26/91 a meeting was held at the District Attorney Office. Detective Fogerty explained to Attorneys Crossen and Gelhaar that the Boston Police was conducting an investigation of the bombing death of Patrolman Hurley's death and informed them that their clients were not suspects in the investigation. The Police wanted to eliminate them in the investigation and requested the following:

- a) fingerprints and palm prints (major case prints) will return prints if no match / prints to be checked against the vehicle of Thomas Shay
- b) take polygraph test
- c) interview for alibi for the weekend. (question asked would that expand further and informed that it was possible.

Attorneys Crossen and Gelhaar requested any reports of prior interviews with their clients. No objection to that prior to ADA O'Meara reviewing.

Attorney Crossen stated that his client had taken a polygraph test and would supply finger and palm prints. Without reviewing his clients prior statements would make no determination on further interview.

Attorney Gelhaar stated that he would recommend that his client not take a polygraph test and would supply finger and palm prints. Without reviewing his clients prior statements would make not determination on further interview.
